BRANCH OF MINING OPERATIONS  
CONSERVATION DIVISION

Confidential Claim Retracted

Authorized by: SE

Date: 6/25/13

On October 12, 1971, the writer accompanied by Jerry Eshbaugh, Geologist for the company, inspected the drilling operations on Laguna Tribal land uranium permit known as Tract 6. Two drill rigs were being used on the project. To date 60 holes have been drilled with immediate plans to drill about 60 more holes. This drilling will be completed in the near future.

Most of the drill pits have been backfilled in a satisfactory manner, but most of the holes have not been plugged. No artesian water was encountered.

The engineers of this office will make periodic checks of the permit as exploration activities progress.

David R. Stewart  
Mining Engineer
